

Division of Mental Health, Developmental Disabilities and Substance Abuse Services

Quality Quick Facts September 2006

TEXT ONLY:

Monitoring data from various areas of a person's life helps measure the quality of that person's life. This data compares responses from people with developmental disabilities in North Carolina to averages from other states.

North Carolina people with developmental disabilities reported:

64 percent have friends and caring relationships compared to 72 percent in other states.
79 percent see family when they want to compared to 78 percent in other states.
90 percent know their case manager compared to 81 percent in other states.
88 percent have an advocate compared to 85 percent in other states.
